Current Features

Feature	Description
Table View	Players have a game board with all cards laid out on screen.
Growing Cards with Mouseover	When players mouse over a card it'll grow, making it easier for the player to read information on the card.
Play Card	When players click on a playable card in their hand, they will play it, giving them the points or actions that the card is worth, and removing the card from their hand.
Buy Card	When Players click on a card from the supply and they have sufficient coins and buy points to buy the card it will be moved to their discard pile, and the required amount of coin will be removed from their coin points.
End Turn	When the player clicks the end turn button, their turn will end, and they can start their next turn.
Click Supply Card Feedback	When players click a card in the supply deck it'll blink, assuring them that they clicked that card.
New Game	When the player clicks the new game button a new instance of the game will be created.

Planned Features

Feature	Description
End Turn	When the player clicks the end turn button, their turn will end, and an AI player will start their turn.
Choose number of players	Players will be able to choose the number of AI opponents they'll play against.
Trash Card	Players will be able to click on the trash pile card, and then on a card in their hand that they want to trash, and it'll go to the trash pile.
